

# TONE

ULRICH SÜSSE

for  
FEMALE VOICE, PIANO, 2 TAPERECORDERS  
AND 3 TAPES

STAGE: THE POSITION OF PIANIST AND SINGER CAN BE ARRANGED ACCORDING TO THEIR WILL AND NEEDS.  
THE SECOND TAPEREADER SHOULD BE WITHIN REACH OF THE SINGER. THE SINGER HAS TO HAVE A CHAIR.

PIANO SHOULD BE PREPARED LIKE THIS:

for everybody: ↓ undefined pitch

J = M.M. 60 IF TIME IS NOT DETERMINED BY SECONDS  
≈ 5" APPROXIMATELY 5 SECONDS

[ ] MATERIAL BOX CAN BE PLACED FREELY  
WITHIN THE GIVEN DURATION

PIANO: SB | LOWEST STRINGBOX

 HITTING STRINGS  
WITH OPEN HAND

① PING PONG BALL

② DROP ①, DISTANCE: 5-8 INCHES

■ CLUSTER

VOICE :

- PITCH
- ✗ BETWEEN PITCH  
AND SPRECHSTIMM
- ✗ SPRECH STIMME

The score (pg 1 to 10) was used for the first performance in April 10, 1973. The interpretation of the large improvisation section was left up to the performers with only a few hints on top of page 9 (PLAY IN THE RHYTHM...) as well as the time structure of tape 1.

Shortly after the first couple of performances a supplement score was made in order to specify the tape actions and to make suggestions for the performers.

Yet the original idea, as formulated in the first text of the supplementary score (under: a) the tape...) still stands: the tape should replace a score, i.e. the same way in which one reads a score, one can "read" a tape by repeated listening.

original text: *The additional score covers the improvisation part at the top of page 9; it consists of an approximate notation of the tape action (V=voice, taped and live, E=electronics) and improvisation suggestions for the performers. Although these suggestions leave space for creativity and can even be completely changed and replaced by different convincing patterns, the precondition for performing is that a) the tape has to be known thoroughly thus b) being aware that one can rest very often.*

**PITCH NOTATION:**  more emphasized pitches  
 less emphasized pitches  
• not emphasized pitches } (through length, frequency,  
register)

The performers can make use of the notated pitches before, at or after their appearance on tape - corresponding, diverging or both.

The sequence of the 4 additional score pages is not fixed with numbers, but with the letters of the title: T - O - N - E .

The beginning of the first page (T): Bachchoral correlates with the start of page 8. The timing: 12'18" on top of page 8 was taken, when the piano solo (middle of page 0) was not AD LIBITUM, but restricted to 40". The 12'18" sequence ends at the bottom of page 10.

The additional score doesn't replace page 8, but serves to specify the tape actions (LOOK INTO EVERY ELEMENT...) at the end of page 8 - (it cannot be done more precisely since the overlapping sounds of tape 3 are different at each performance).

In the performance it is possible to use the switching of scores as a theatrical moment, especially when the T - O - N - E section is finished and the performers refer back to the old score (pg 9 and 10).

- Timing is indicated by a)  23"  numbers between arrows  
(bottom of pg 0)
- b) --- [2'42"] --- - numbers within brackets  
--- [2'42"] --- 2'42" between dotted lines indicate the continuation of  
the timing into the next system. The end of that  
time sequence is signaled without brackets  
(pg T - O)
- c) | numbers under vertical dotted lines indicate a spot, counted from the start of  
| each section (page T).  
27"
